Meteorological and Geoastrophysical Abstracts is a monthly publication presenting, in English, current meteorological and geoastrophysical abstracts gleaned from foreign and domestic literature.

Meteorological & Geoastrophysical Abstracts

Publication Office

American Meteorological Society
45 Beacon Street, Boston, MA. 02108

Editorial Office

P.O. Box 1736
Washington, D.C. 20013
Telephone: (202) 546-6734

Address all business communications, orders, and inquiries to the Executive Director, American Meteorological Society 45 Beacon Street, Boston, MA. 02108. Exchanges and reprints may be sent directly to P.O. Box 1736, Washington, D.C. 20013.

Subscription Rates

Government agencies and industrial, commercial, scientific, and research organizations, $400.00. Educational institutions and public libraries, $200.00. Back volumes: Vols. 16–28 (1965–1977), same as above. Vols. 1–15 (1950–1964), $50.00 per vol.; $10.00 per issue. Special price, Vols. 1–10 (1950–1959), complete set, $200.00. Add $8.00 per volume for subscriptions outside U.S.

Cumulative Author, Subject, and Geographic Indexes
(Vol. 29, Nos. 1–12, 1978)

December 1979

Published by the American Meteorological Society at 45 Beacon Street,
Boston, MA 02108. Second-class postage paid at Boston, MA and
at additional mailing offices.

ERRATA

Volume 28, 1977

28.12–113	Author: *change* "McManins, P. C." to "Manins, P. C."

Volume 29, 1978

29.1 –49	Corporate author: *insert* "Yugoslavia" after "Zagreb."
29.1 –50	Corporate author: *insert* "Yugoslavia" after "Zagreb."
29.1 –60	Author: *add* "III" to "Sherman, J. W."
29.1 –94	Author: *change* "Gronas" to "Grønås."
29.1 –117	Author: *change* "Zahariyev" to "Zakhariyev."
29.1 –164	Author: *change* "Benairie" to "Benarie."
29.1 –167	Author: *change* "Devitofracesco" to "Devitofrancesco."
29.1 –277	Title: *change* "Tray ektorii . . . okeana" to "Trayektorii . . . okeanov."
29.1 –295	Title: *change* "dvishneniya" to "dvizheniya."
29.1 –459	Author: *change* "Gadsen" to "Gadsden."
29.1 –460	Author: *change* "Gadsen" to "Gadsden."
29.1 –496	Author: *change* "Nikolsky" to "Nikolskiy."
29.2 –226	Author: *change* "Pilipowskij" to "Pilipowskyj."
29.2 –337	Serial note: *change* "*Research Series* No. 19" to "*Research Series* No. 10."
29.2 –503	Title: *change* "Pamir–Alai" to "Pamir–Alay." Subject Heading: *change* "Alai Mts." to "Alay Mts."
29.2 –528	Subject Heading: *change* "Roads on ice" to "Roads of ice."
29.3 –12	Editor: *change* "Bolla" to "Bolle."
29.3 –192	Author: *change* "Gottfried, Hanel" to "Gottfried, Hänel."
29.3 –276	Title: *change* "Vozbyzhdeniye" to "Vozbuzhdeniye."
29.3 –282	Title: *change* "oradea" to "Oradea."
29.3 –353	Author: *change* "Kattawar, C. W." to "Kattawar, G. W."
29.3 –361	Title: *change* "CANEX" to "CAENEX."
29.3 –376	Author: *change* "Debois" to "Desbois."
29.3 –512	Author: *change* "Carlson, T. M." to "Carlson, T. N."
29.3 –579	Title translation: *change* "Many year" to "Multi-year."
29.4 –256	Author: *change* "Halles" to "Hales."
29.4 –453	Title: *change* "cannonical" to "canonical."
29.4 –472	Author: *change* "Norvine" to "Norwine."
29.5 –57	Author: *change* "Kalnay–Rivas" to "Kálnay–Rivas."
29.5 –301	Title: *change* "Poona" to "Pune."
29.6 –25	Title: *change* "meteorology laboratory" to "Meteorology Laboratory."
29.6 –196	Author: *change* "Murthy, B. Suryanarayana" to "Suryanarayana Murthy, B."
29.6 –330	Abstract and Subject Heading: *change* "Ebersberger Forst" to "Ebersberg Forest."
29.7 –128	Library note: *change* "Das (A QC 851 L54)" to "DAS (A QC 851 I54)."
29.7 –133	Author: *change* "Bjerkestrand A." to "Bjerkestrand, A."
29.7 –168	Author: *change* "Sommerville" to "Somerville."
29.7 –306	Author: *change* "Podgorny" to "Podgornyy."
29.7 –442	Library note: *change* "DAS (A QC 851 L54)" to "DAS (A QC 851 I54)."
29.8 –33	Corporate author: *change* "Seccíon" to "Sección."
29.8 –50	Title: *change* "terre-satellite" to "terre–satellite." Title translation: *change* "Earth-satellite" to "Earth–satellite."
29.8 –237	Title: *change* "antarktike" to "Antarktike."
29.8 –547	Author: *change* "Moores" to "Mooers."
29.9 –29	Corporate author: *insert* "Yugoslavia" after "Zagreb."
29.9 –45	Author: *change* "Skoda, Georg" to "Skoda, Von Georg."
29.9 –139	Author: *change* "Ivanov-Kholodny" to "Ivanov-Kholodnyy."
29.9 –164	Author: *change* "Sethuraman" to "SethuRaman."
29.9 –265	Author: *change* "Maresh, Konstantin" to "Mareş Constantin" and "Maresh, Ilyana" to "Mareş, Ileana."
29.9 –283	Author: *change* "Kao, S. K." to "Kao, S.-K."
29.9 –309	Author: *change* "Pătăchi, Iulia" to "Pătăchie, Iulia."
29.9 –355	Title: *change* "Syowa" to "Showa."

AN ALPHABETICAL LIST OF BIBLIOGRAPHIES PUBLISHED IN PART II OF *METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS* (UNTIL 1960, *METEOROLOGICAL ABSTRACTS AND BIBLIOGRAPHY*), VOL. 1, NO. 1, JAN. 1950–VOL. 15, NO. 12, 1964

Acoustical Propagation, 1(10), 1950; 10(7), 1959
Aerobiology, 1(2), 1950
Agricultural Meteorology, 10 (Supplement No. 3), 1959
Airglow, 8(2), 1957; 11(11), 1956
Albedo, 8(7), 1957
Arctic Synoptic Meteorology, 7(1), 1956
Atmospheric Dynamics and Circulation, 12(12), Pt. 3, 1961
Atmospheric Pollution, 1(1), 1950
Auroral Physics, 4(10), 1953; 5(3), 1954; 12(1,2), 1961

Balloons, 5(5), 1954
Bibliographies, 6(1,2), 1955
Brooks, C. E. P., Works of, 10(1), 1959

Carbon Dioxide, 3(2), 1952
Climate of Arctic, 5(9), 1954
Climate of Argentina, etc., 3(3), 1952
Climate of Australia, 4(4), 1953
Climate of Central Africa, 3(8), 1952
Climate of Enclosed Spaces, 7(2), 1956
Climate of Middle East, 2(6), 1951
Climate of Near East, 2(5), 1951
Climate of Northeast Africa, 2(10), 1951
Climate of Northwest Africa, 3(1), 1952
Climate of Pacific, 4(9), 1953
Climate of Southeast Asia, 5(2), 1954
Climatic Changes, 1(7), 1950; 15(11,12), 1964
Cloud Physics, 1(3), 1950; 6(6), 1955; 13(3), 1962
Condensation Trails, 2(9), 1951
Constants, Nomograms, etc., 2(4), 1951
Cooling Power, 6(11), 1955
Cosmic Rays, 7(3,4), 1956; 9(9), 1958; 13(4), 1962; 14(10,11), 1963

Dew, 3(4), 1952

Energy Exchange, Sea-Atmosphere, 13(5) 1962
Evaporation, 1(11), 1950; 10(8), 1959
Evapotranspiration, 10(9,10), 1959

Forecast Verification, 11(7), 1960
Forecasting, 12(12 Pt. 1), 1961
Forecasting Special Elements, 8(3), 1957
Forest Micrometeorology, 8(4), 1957
Frost, 4(3), 1953

Geomagnetism, 9(10,11), 1958; 13(2), 1962
Glaze and Rime, 3(10), 1952

Hail, 1(4), 1950
Humidity Instruments, 13(12), 1962
Hydrometeorological Forecasting, 8(5), 1957; 10 (Supplement No. 2), 1959

Icing, 1(9), 1950
Industrial Meteorology, 5(10), 1954
Instruments and Techniques, 10 (Supplement No. 1), 1959
Inversions, 7(6), 1956
Ionosphere, 6(4), 1955; 11(4,5,6), 1960; 13(6), 1962 13(10), 1962; 15(1), 1964; 15(12), 1964

Jet Stream, 4(7), 1953

Lightning, 14(9), 1963
Limnology, 12(3), 1961
Long-Range Forecasting, 2(1,2), 1951; 9(7), 1958
Lunar Influences, 14(12), 1963

Medical Meteorology, 8(11), 1957
Meteors, 8(8), 1957
Mountain Meteorology, 2(11), 1951

Noctilucent Clouds, 15(4), 1964
Nuclei, 6(8,9), 1955; 15(6), 1964
Numerical Forecasting, 5(6), 1954; 8(6), 1957; 11(3), 1960; 14(6), 1963

Objective Forecasting, 3(5), 1952
Ocean Waves, 5(11), 1954
Ocean Waves and Currents, 9(4), 1958; 13(9), 1962; 15(5), 1964
Oceanographic Instruments, 14(4,5), 1963
Oceanographic Meteorology, 5(1), 1954
Ozone, 10(5,6), 1959

Physical and Dynamic Oceanography, 9(5,6), 1958; 12(12, Pt. 2), 1961
Planetary Atmospheres, 12(9,10,11), 1961
Precipitation, 10 (Supplement No. 2), 1959
Precipitation Chemistry, 12(7), 1961

Radar Meteorology, 2(8), 1951; 6(7), 1955; 9(8), 1958; 11(8), 1960; 14(2), 1963
Radiation Bioclimatology, 4(8), 1953
Radiation Data, 5(7), 1954
Radio Astronomy, 9(1), 1958; 14(7,8), 1963; 15(9) 1964
Radioactivity in the Atmosphere, 7(5), 1956; 9(3), 1958; 13(7,8), 1962; 15(8), 1964
Reference Works, 11(1), 1960
Rocket Meteorology, 11(9), 1960

Satellite Meteorology, 11(10), 1960; 14(3), 1963; 15(2,3), 1964
Sferics, 4(11), 1953; 10(4), 1959
Snow Micrometeorology, 7(7,8), 1956
Soil Moisture, 10(3), 1959
Soil Temperature, 2(3), 1951
Solar Astrophysics, 9(2), 1958
Solar Events, 13(11), 1962
Solar Radiation, 15(10), 1964
Solar Weather Relationships, 8(1), 1957
Special Winds, 2(7), 1951
Storm Surges, 6(3), 1955
Stratus Forecasting, 3(6), 1952
Subsurface Ocean Currents, 15(5), 1964

Textbooks, 11(2), 1960
Thunderstorms, 1(8), 1950
Tornadoes, 1(5), 1950; 10(2), 1959
Tropical Cyclones, 7(9,10,11), 1956
Tropopause, 5(4) ,1954
Tropospheric Propagation, 8(9,10), 1957
Turbulence, 3(11), 1952; 4(1,2), 1953

Upper Atmosphere Humidity, 12(8), 1961
Upper Atmosphere Photochemistry, 6(5), 1955
Upper Atmosphere Structure, 12(4,5,6), 1961
Upper Atmosphere Winds, 4(5,6), 1953
Urban Climatology, 3(7), 1952

Van Allen Belts, 13(1), 1962
Vertical Motion, 5(8), 1954
Visibility, 3(9), 1952
Volcanic Dust, 1(6), 1950

Weather Modification, 1(3), 1950; 6(10), 1955; 11(12) 1960; 13(3), 1962; 14(1), 1963; 15(6,7), 1964
Wind Waves and Swell, 5(11), 1954

29.12–459	Title: *change* "shirotkh" to "shirotakh."

AUTHOR INDEX

Note: In this index, author entries are arranged alphabetically and, under each author, titles are arranged alphabetically by the first word (excluding articles) of the original title. Translated titles are placed in brackets after foreign language titles. Authors whose names begin with an article or preposition (de, di, le, la, van, etc.) are generally indexed under that article or preposition. Cross references indicate variations from that practice, or possible alernate entries. Multiple-author titles are listed under the first author and the coauthors are entered after the title.

A

Aagaard, Knut
Measurements with moored instruments in ice-covered waters (*with* **Karig, F.** and **Darnall, C.**), 29.5–531
Aarons, J., *see* **Mikkelsen, I. S.**, 29.11–221
Aarons, Jules
Localized origin of equatorial F-region irregularity patches (*with others*), 29.8–151
See also **Basu, S.**, 29.7–272; 29.9–126; **Martin, E.**, 29.1–226
Aas, Eyvind
Influence of fresh water on light conditions in fjords (*with others*), 29.12–513
Aase, J. K.
Comparison of two formula types for calculating long-wave radiation from the atmosphere (*with* **Idso, S. B.**), 29.12–225
Abbas, Mohie A.
Relation between sunshine duration and mean daily solar radiation on a horizontal surface in Iraq (*with* **El-Nesr, M. K.**), 29.8–257; (*with* **El-Nesr, M. K.**), 29.11–320
Abbey, Robert F., Jr.
Risk probabilities associated with tornado wind speeds, 29.5–253
Abbott, Douglas A.
Hemispheric simulation of the Asian summer monsoon, 29.3–301
Abdu, M. A., *see* **Batista, I. S.**, 29.3–249
Abdul Khader, M. H.
Flow toward a partially penetrating well in a bounded artesian aquifer (*with* **Ramadurgaiah, D.**), 29.5–508
Abe, Katsuya, *see* **Takeuchi, M.**, 29.9–285
Abel, P. G.
Empirical model for atmospheric transmittance functions and its application to the Nimbus-6 HIRS experiment (*with* **Arking, A.** and **Smith, W. L.**), 29.12–224
Abernethy, James J.
Protection of people and essential facilities, 29.5–254
Abiodun, Adigun Ade
Movement of water columns in Lake Kainji (*with* **Adenkji, H. A.**), 29.10–518
Abrahamsen, Gunnar
Impacts of acid precipitation on coniferous forest ecosystems (*with* **Tveite, B.** and **Horntvedt, R.**), 29.1–377
Abramova, T. A.
K metodike rekonstruktsii klimaticheskikh usloviy aridnykh rayonov (po paleobotanicheskim dannym) [Method of reconstruction of the climatic conditions of arid regions (from paleobotanic data)], 29.11–478
Abranin, E. P.
Angular sizes of stria burst sources in the range 24–26 MHz (*with others*), 29.8–465
Abshire, N. L.
Aerosol characterization at Colstrip, Montana (*with others*), 29.8–102
Achy, A. S.
Numerical study of convective cumulus in the wet tropical environment (*with* **Baudet, J.** and **Bagui, V.**), 29.10–355

Ackerman, B.
  Design of the High Plains Experiment with specific focus on phase 2, single cloud experimentation (*with others*), 29.3–166
  Summary of METROMEX, Vol. II: Causes of precipitation anomalies (*with others*), 29.10–419
Ackerman, M.
  Stratospheric CH_4, HCl, and ClO and the chlorine–ozone cycle (*with* **Muller, C.** and **Frimout, D.**), 29.2–153
Acosta, Marli Jair Carneiro, *see* **Da Mota, F. S.**, 29.2–239; 29.11–323
Acquista, Charles
  Scattering by tenuous aerosols, 29.7–205
Adamov, R. G., *see* **Davydov, V. M.**, 29.9–133
Adamowicz, R. F., *see* **Hill, F. B.**, 29.4–415
Adams, C. G.
  Messinian salinity crisis and evidence of late Miocene eustatic changes in the world ocean (*with others*), 29.2–536
Adams, Charles N.
  Radiative transfer in spherical shell atmospheres, Pt. 1, Rayleigh scattering (*with* **Kattawar, G. W.**), 29.11–332
Adams, Michael S., *see* **Lechowicz, M. J.**, 29.6–426
Adams, W. M.
  Differential rotation of short-lived solar filaments (*with* **Tang, F.**), 29.4–549
Adefolalu, D. O.
  On the possible biomedical effects of variable ozone concentration in the Tropics, 29.8–88
  Study of "synoptic types" of the African easterly perturbation, 29.10–239
Adenkji, H. A., *see* **Abiodun, A. A.**, 29.10–518
Adiks, T. G.
  Perenos izlucheniya v okne prozrachnosti 2,86÷4,16 mkm atmosfery Venery [Radiation transport through the 2.86–4.16-μm window of the Venus atmosphere] (*with others*), 29.8–441
Adler, Robert F.
  Satellite-observed latent heat release in a tropical cyclone (*with* **Rodgers, E. B.**), 29.2–221
Adler, Shoshana, *see* **Ohring, G.**, 29.6–417
Admirat, Pierre, *see* **Mezeix, Jean-François**, 29.7–123
Advances in Environmental Science and Technology
  Vol. 7, 29.3–183
Aerospace Corp., Space Sciences Lab., El Segundo, CA.
  Compilation of contributions to the 15th International Cosmic Ray Conference, 29.3–13
Afanas'yeva, V. I.
  Spokoynyye Sq-variatsii v San-Khose (Kub i vydeleniye magnitnoy aktivnosti v foku tokovoy sistemy Sq [Quiet Sq-variations San José (Cuba) and definition of magnet activity in the focus of an Sq-curre system] (*with* **Enrikes, B.**), 29.9–470
Afinogenov, L. P.
  Avtomatizirovannaya sistema polucheniy atmosferno-elektricheskoy informats [Automated system for acquiring informa tion on atmospheric electricity] (*wi others*), 29.10–77
Afshar, Abas
  Model for simulating soil-water content co sidering evapotranspiration (*with* **Marin M. A.**), 29.9–66
Agarwal, Jugal K.
  Generating submicron monodisperse aeroso for instrument calibration (*with* **Sem, G. J.** 29.10–73
Agee, E. M.
  MCC and gull flight behavior (*with* **Sheu,** **J.**), 29.8–327
  Observational study of the West Lafayett Indiana, tornado of 20 March 1976 (*wi others*), 29.1–292
  See also **Church, C. R.**, 29.2–229
Agee, Ernest M., *see* **Burt, W. V.**, 29.2–29 **Mitchell, D. L.**, 29.10–338
Ageta, Yutaka
  Observations of sea salt particles in the air Mizuho Plateau (*with* **Kobayashi, S.**), 29.9 320
Aggarwal, S. K., *see* **Singal, S. P.**, 29.1–33
Aggson, T. L.
  Observations of large transient magnet spheric electric fields (*with* **Heppner, J. P.** 29.4–202
Agnihotri, C. L., *see* **Gopala Rao, U. V.**, 29.12–5 **Singh, M. S.**, 29.11–282
Agrawal, S. P.
  Solar polar coronal holes and the north south, cosmic-ray gradient (*with* **Ven katesan, D.** and **Lanzerotti, L. J.**), 29.11–53
Aguado, Eduardo
  Sensitivity analysis in aquifer studies (*wi* **Remson, I.** and **Sitar, N.**), 29.2–438
Ahlnäs, Kristina, *see* **Solomon, H.**, 29.8–546
Ahlquist, N. C., *see* **Waggoner, A. P.**, 29.5–11
Ahmad, Imad A.
  Coronal He^+ λ 304 radiation, 29.2–413
  EUV analysis of polar plumes (*with* **Withbro G. L.**), 29.2–408
Ahmed, M.
  Topside ionospheric trough morphology a mid- and high-latitudes (*with* **Sagalyn, R**

C.), 29.11–191
Ahn, Hui Soo
Numerical experiment on tidal currents in Asan Bay (*with* **Lee, S. W.**), 29.12–575
Ahrens, Wilfried
Zur Verwendung der Magnus-Formel in numerischen Modellen der Wettervorhersage [Use of the Magnus formula in numerical weather prediction models], 29.2–67
Ahuja, L. R.
Measuring hydrologic properties of soil with a double-ring infiltrometer and multiple-depth tensiometers (*with* **Rahman, A.** and **El-Swaify, S. A.**), 29.5–407
Predicting runoff initiation times under field conditions in tropical (Hawaii) soils (*with* **El-Swaify, S. A.** and **Dangler, E. W.**), 29.5–400
Aida, M.
Transfer of solar radiation in an array of cumuli, 29.4–281

Walker, J. C. G., 29.7–47
Watkins, B. J. et al., 29.8–176
Wedde, T. et al., 29.1–33

Radar lightning detection
Gal'perin, S. M. et al., 29.10–27; 29.10–28

Radar mesospheric investigations
Harper, R. M. et al., 29.6–148

Radar meteorological equipment
Bell, E. J., 29.5–41
Treussart, H. P., 29.6–51

Radar meteorology
André, M., 29.11–70
Bell, E. J., 29.5–41
Campistron, B. et al., 29.11–21
Kawecki, A., 29.11–22

Radar meteorology conferences
Radar Meteorology Conference, 18th, Atlanta, Georgia, March 28–31, 1978, 29.7–6

Radar meteorology manuals
United States National Oceanic and Atmospheric Administration. National Weather Service, 29.12–76

Radar observation of auroras
Shirochkov, A. V., 29.2–378

Radar observation of cloud seeding
Chatterjee, R. N. et al., 29.10–127

Radar observation of convective clouds
Petrov, R., 29.4–39

Radar observation of cyclonic storms
Mukherjee, A. K. et al., 29.11–290

Radar observation of hailstorms
Federer, B. et al., 29.5–398

Radar observation of ice drift
Ono, N., 29.10–524

Radar observation of lake ice
Bolsenga, S. J., 29.11–572
Hagman, B. B., 29.3–566

Radar observation of meteors
Lindblad, B. A., 29.10–31

Radar observation of ocean currents
Barrick, D. E. et al., 29.3–54

Radar observation of precipitation
Atlas, D. et al., 29.2–58

Radar observation of refractive index
Ecklund, W. L. et al., 29.3–58
VanZandt, T. E. et al., 29.12–167

Radar observation of sea ice
Parashar, S. K. et al., 29.6–50
Zagorodnikov, A. A. et al., 29.3 562

Radar observation of sea waves
Crombie, D. D. et al., 29.7–37
Elachi, C. et al., 29.5–584; 29.8–19
Lipa, B., 29.6–47
Zagorodnikov, A. A. et al., 29.2–557

Radar observation of showers
Konrad, T. G., 29.6–46

Radar observation of soil moisture
Hirosawa, H. et al., 29.12–28

Radar observation of state of sea
Harger, R. O. et al., 29.7–41

Radar observation of storms
Darrah, R. P., 29.12–196
Wilk, K. E., 29.6–52
Zittel, W. D., 29.6–53

Radar observation of thunderclouds
Kachurin, L. G. et al., 29.10–30

Radar observation of thunderstorms
Gal'perin, S. M. et al., 29.10–27
Garcia Diaz, L., 29.10–262
Lemon, L. R., 29.1–29

Radar observation of tropical cyclones
Raghavan, S., 29.8–223

Radar observation of upper air wind
Balsley, B. B. et al., 29.5–40
Woodman, R. F., 29.6–150

Radar observation of wind shear
Browning, K. A. et al., 29.6–329

Radar observation techniques
Carbone, R. E., 29.2–37

Radar ocean wave measurements
Barrick, D. E., 29.1–577; 29.1–578
De Loor, G. P. et al., 29.7–38
Harger, R. O. et al., 29.7–41

Valenzuela, G. R., 29.7–46
Walsh, E. J. et al., 29.8–28
Wright, J. W., 29.7–48

Radar precipitation echo classification
Osano, S., 29.6–49

Radar precipitation echoes
Aoyagi, J. et al., 29.5–98
Braham, R. R., Jr. et al., 29.8–363
Kononenko, L. G. et al., 29.3–60
Tatehira, R. et al., 29.1–32

Radar precipitation information uses
Greene, D. R. et al., 29.3–59

Radar precipitation measurement techniques
Hildebrand, P. H., 29.7–42
Stanchev, K. et al., 29.4–41

Radar precipitation studies
Drufuca, G., 29.3–57
Ulbrich, C. W. et al., 29.8–27

Radar–rain-gage comparison
Barge, B. L. et al., 29.12–26
Brady, P. J., 29.6–371
Collier, C. G., 29.5–42

Radar rainfall intensity measurement techniques
Meneghini, R., 29.8–23
Puhakka, T., 29.9–23

Radar rainfall measurement techniques
Atlas, D. et al., 29.4–37

Collier, C. G., 29.5–42
Creteanu, V., 29.3–55
De, A. C. et al., 29.1–28
Flanders, A. F., 29.4–38

Radar rainfall measurements
Barge, B. L. et al., 29.12–26

Radar range correction
Allen, R. S. et al., 29.7–271

Radar reflections from hail
Dye, J. E. et al., 29.12–27
Waldvogel, A. et al., 29.7–486

Radar reflections from rain
Hall, P. M. et al., 29.8–20

Radar reflectivity
Rinehart, R. E., 29.12–69

Radar reflectivity of raindrops
Geotis, S. G., 29.12–335

Radar reflectivity–precipitation rate (*Z–R*) relationships
Brady, P. J., 29.6–371
Cunning, J. B. et al., 29.3–56
Puhakka, T., 29.9–23

Radar scattering from auroras
Minkoff, J., 29.6–48

Radar snowstorm observations
Muench, H. S. et al., 29.3–61

Radar soundings of snow cover
Vickers, R. S. et al., 29.3–454

Radar stability determination
Randerson, D., 29.4–40

Radar storm observation application
Rinehart, R. E. et al., 29.9–24

Radar storm rainfall studies
Marshall, J. S. et al., 29.6–43

Radar storm warning systems
Lemon, L. R., 29.1–29
Zittel, W. D., 29.6–53

Radar stratospheric investigations
Rüster, R. et al., 29.6–145

Radar studies of turbulent diffusion
Ricks, N. R., 29.3–62

Radar thermospheric soundings
Alcaydé, D. et al., 29.1–212
Evans, J. V., 29.8–156

Radar tornado detection
Darkow, G. L., 29.5–258

Radar tornado tracking
Darkow, G. L., 29.5–258

Radar upper air soundings
Klostermeyer, J., 29.12–29
Tepley, C. A. et al., 29.11–185

Radar wavelengths
Kachurin, L. G. et al., 29.10–30

Radar weather equipment
Wilk, K. E., 29.6–52

Radar wind measurement techniques
De Maistre, J. C. et al., 29.7–39
Ecklund, W. L. et al., 29.3–58
Hardesty, R. M. et al., 29.2–30
Hasselmann, K. et al., 29.8–21; 29.10–29
Ross, D. et al., 29.9–25

Radiation at sea surfaces
Plass, G. N. et al., 29.3–353

Radiation balance
Gruber, A., 29.4–266

Radio-wave absorption by water vapor
Llewellyn-Jones, D. T. et al., 29.12–299

Radio-wave attenuation in hail
Bringi, V. N. et al., 29.8–376

Radio-wave attenuation in rain
Assis, M. S. et al., 29.8–348
Bostian, C. W. et al., 29.8–41
Brussaard, G., 29.8–42
Capsoni, C. et al., 29.8–349
Damosso, E. D. et al., 29.8–350
Delonge, P. et al., 29.8–352
Djik, J. et al., 29.8–44
Fedi, F. et al., 29.8–366
Fimbel, J. et al., 29.8–355
Goldhirsh, J., 29.2–315
Hodge, D. B. et al., 29.2–316
Martinon, R., 29.8–50
Ugai, S. et al., 29.8–370
Valentin, R., 29.8–360

Radio-wave effects on ionosphere
Chernogor, L. F., 29.9–130
Gul'yel'mi, A. V. et al., 29.11–524
Kozlov, S. I. et al., 29.3–262
Krokhmal'nikov, Ye. B. et al., 29.11–215
Perkins, F. W. et al., 29.8–163
Showen, R. L. et al., 29.5–218; 29.6–198
Sipler, D. P. et al., 29.8–169
Vyaznikov, V. V. et al., 29.11–244

Radio-wave propagation
Misme, P., 29.11-251
Ott, R. H. et al., 29.8–304

Radio-wave propagation anomalies
Richter, J. H. et al., 29.7–308

Radio-wave propagation between space vehicle and Earth
Vogel, W. J. et al., 29.3–105

Radio-wave propagation forecasting
Richter, J. H. et al., 29.7–292

Radio-wave propagation in planetary atmospheres
Haugstad, B. S., 29.8–186; 29.11–409

Radio-wave propagation in tropical regions
Andrews, M. K., 29.11–193

Radio-wave refraction in planetary atmospheres
Plotnikov, A. V., 29.8–440

Radio-wave scattering by water waves
Wentz, F. J., 29.5–476

Radio-wave transmission through clouds
Mendenhall, L. D. et al., 29.6–363

Radio-wave transmission through rain
Mendenhall, L. D. et al., 29.6–363

Radioactive aerosols
Finland. Meteorological Institute, Helsinki, 29.7–309
Fraizier, A. et al., 29.3–280
Ireland. Meteorological Service, Dublin, 29.1–244; 29.5–229; 29.6–209; 29.11–252; 29.11–253; 29.12–168

Radioactive contamination of atmosphere
Gregory, W. S. et al., 29.5–268
Martin, J. J. et al., 29.5–231

Radioactive contamination of groundwater
Hare, F. K., 29.7–551

Radioactive contamination of plants
Fraizier, A. et al., 29.3–280

Radioactive contamination of water
Claassen, H. C., 29.8–475

Radioactive diffusion
Fraizier, A. et al., 29.3–280
Halitsky, J., 29.1–259
Mochizuki, S., 29.11–254

Radioactive effluents
Martin, J. J. et al., 29.5–231

Radioactive emanations
Martell, E. A., 29.3–281

Radioactive fallout exchange, stratosphere/troposphere
Reiter, E. R., 29.4–209

Radioactive fallout forecasting
Duncan, L. D. et al., 29.7–170; 29.10–112

Radioactive fallout in ice
Lorius, C. et al., 29.9–539

Radioactive fallout measurements
Cambray, R. S. et al., 29.3–283

Radioactive fallout stratospheric propagation
Bauer, E. et al., 29.12–275

Radioactive fallout transport
Duncan, L. D. et al., 29.10–112

Radioactive isotope concentrations in water
Calf, G. E., 29.12–478
Vinogradov, A. S., 29.7–581

Radioactive isotope uses in paleoclimatology
Duplessy, Jean-Claude, 29.6–421

Radioactive Pb-210 method
Smith, J. N. et al., 29.6–2

Radioactive precipitation measurements
Finland. Meteorological Institute, Helsinki, 29.7–309
Ireland. Meteorological Service, Dublin, 29.1–244; 29.5–229; 29.6–209;

29.11–252; 29.11–253; 29.12–168

Radioactive rainwater measurements
Cambray, R. S. et al., 29.3–283

Radioactive residence time
Bleichrodt, J. F., 29.10–225

Radioactive seawater
Kautsky, H., 29.7–310

Radioactive sulfur
Roedel, W. et al., 29.1–247

Radioactive tracers in groundwater hydrology
Ivanovich, M. et al., 29.5–506

Radioactive tracers in hydrology
Pilgrim, D. H. et al., 29.12–351

Radioactive tracers in hydrometeorology
Holecek, G. R. et al., 29.3–464

Radioactive waste disposal underground
Hare, F. K., 29.7–551

Radioactivity effects on atmospheric electricity
Semenov, K. A., 29.10–436

Radioactivity in the atmosphere measurements
Finland. Meteorological Institute, Helsinki, 29.7–309
Ireland. Meteorological Service, Dublin, 29.1–244; 29.5–229; 29.6–209; 29.11–252; 29.11–253; 29.12–168

Radioactivity measurements
Wessely, E., 29.10–224

Radioactivity meteorology
Mitru, D. et al., 29.3–282

Radioactivity variations
Mitru, D. et al., 29.3–282

Radiocarbon production
Brown, J. C. et al., 29.2–181

Radiometer calibration
Reid, M. S. et al., 29.7–111

Radiometer errors
Nolt, I. G. et al., 29.7–109
Reid, M. S. et al., 29.7–111

Radiometers
Brautti, G. et al., 29.7–106
Nolt, I. G. et al., 29.7–110
Vittori, O. et al., 29.6–69
Wardrop, A. J. et al., 29.3–110

Radiometric measurement of aerosols
Deepak, A., 29.4–139
Grether, D. F. et al., 29.5–144
Herman, B. M., 29.4–146

Radiometric measurement of surface temperatures
Stewart, R. B. et al., 29.12–63
Yuhara, K. et al., 29.8–296

Radiometric measurement of water vapor
Aro, T. O., 29.6–37
Fischer, H. et al., 29.6–38
Nolt, I. G. et al., 29.7–109; 29.7–110

Radiometric measurement of wind
Ochs, G. R. et al., 29.7–31

Radiometric scales
Forgan, B. W., 29.5–305

Radiometric surveys of crops
Orlov, V. N. et al., 29.11–17

Radiometric techniques
Dirmhirn, I. et al., 29.4–283
Gille, J. C. et al., 29.4–23
McClatchey, R. A., 29.6–29
Malchow, H. L. et al., 29.4–120
Pitts, D. E. et al., 29.4–32
Twomey, S., 29.4–20
Varanasi, P. et al., 29.3–44

Radiometric temperature measurement techniques
Kaplan, L. D., 29.4–26
Sutherland, R. A. et al., 29.2–247

Radiometric temperature measurements
Shilin, B. V. et al., 29.1–54

Radiosonde ascension rates
Helbig, A., 29.4–63

Radiosonde data processing
Merrill, M. D. et al., 29.10–60

Radiosonde equipment
Pettifer, R. E. W. et al., 29.5–90

Radiosonde errors
Arbuzov, V. N. et al., 29.1–79
Kostyanoy, G. N., 29.1–80

Radiosonde improvement
Hart, R. L. et al., 29.7–127

Radiosonde ozone instruments
Sonntag, D., 29.10–88

Radiosonde receivers
Bird, I. G., 29.6–78

Radiosonde recorders
United States National Oceanic and Atmospheri Administration. National Weather Service, 29.12–68

Radiosonde–satellite sounding comparisons
Asgeirsson, V. et al., 29.3–47
Moyer, V. et al., 29.12–60

Radiosonde temperature errors
Arbuzov, V. N. et al., 29.1–79

Radiosonde temperature measurements
Suzuki, S. et al., 29.9–44

Radiosondes
Still, M. E. et al., 29.6–80

Radiotheodolites
Gröndahl, E., 29.6–76
Sirola, R., 29.6–77

Radon-222 in atmosphere
Larson, R. E., 29.10–226

Radon daughter products in atmosphere
Rangarajan, C. et al., 29.1–245
Shapiro, M. H. et al., 29.6–210

Rain attenuation
Assis, M. S. et al., 29.8–348
Bostian, C. W. et al., 29.8–41
Brussaard, G., 29.8–42
Capsoni, C. et al., 29.8–349
Damosso, E. D. et al., 29.8–350
Djik, J. et al., 29.8–44
Evans, B. G. et al., 29.8–353
Fedi, F. et al., 29.8–366
Fergusson, A. et al., 29.8–354
Fimbel, J. et al., 29.8–355
Martinon, R., 29.8–50
Ugai, S. et al., 29.8–370
Valentin, R., 29.8–360

Rain composition
Hill, F. B. et al., 29.4–415

Rain effects on radio-wave transmission
Fedi, F. et al., 29.8–359
Goldhirsh, J., 29.2–315
Hodge, D. B. et al., 29.2–316

Rain effects on radio waves
Bostian, C. W. et al., 29.8–41
Delogne, P. et al., 29.8–351

Delonge, P. et al., 29.8–352
Evans, B. G. et al., 29.8–353
Fimbel, J. et al., 29.8–47
Maher, B. O. et al., 29.8–369
Martinon, R., 29.8–50
Pontes, M. S., 29.8–368
Shkarofsky, I. P., 29.11–55
Yamada, M. et al., 29.8–55

Rain erosion of missiles
Plank, V. G., 29.2–331

Rain-gage accuracy
Craddock, J. M. et al., 29.12–314
Neff, E. L., 29.4–83

Rain-gage exposures
Changnon, S. A., Jr. et al., 29.4–418

Rain-gage height
Kuźniar, K. et al., 29.7–119

Rain-gage network efficiency
Ishihara, T. et al., 29.7–117
Lenton, R. L. et al., 29.3–116
Nwa, E. U., 29.1–74

Rain-gage networks
Jaccon, G., 29.11–63
Rao, D. V. L. N. et al., 29.1–75

Rain gages
Folland, C. K. et al., 29.4–60

Rain microstructure
Ugai, S. et al., 29.8–370

Rain shower analysis
Konrad, T. G., 29.6–46

Rain washout
Grover, S. N. et al., 29.3–194
Hill, F. B. et al., 29.4–415
Wang, P. K. et al., 29.3–231

Rain-wave attenuation in rain
Fimbel, J. et al., 29.8–47

Rainband structure
Hobbs, P. V. et al., 29.6–374

Raindrop collision
Bradley, S. G. et al., 29.4–436; 29.6–389

Raindrop size distribution
Bradley, S. G. et al., 29.4–436
Joss, J. et al., 29.10–381
Plank, V. G., 29.2–331
Srivastava, R. C., 29.5–388
Ugai, S. et al., 29.8–370

Raindrop size distribution instruments
Breuer, L. J., 29.5–85

Raindrop size distribution measurement techniques
Geotis, S. G., 29.12–335
Wang, Ting-i et al., 29.4–50

Raindrop size spectrometers
Klaus, V., 29.8–367

Raindrop spectra
Breuer, L. J. et al., 29.8–365
Kreuels, R. K. et al., 29.5–387
Srivastava, R. C., 29.5–388

Raindrop spectra measurements
Cami, E. A. et al., 29.12–336

Raindrop velocity
Beard, K. V., 29.1–369

Raindrop velocity measurement techniques
Klaus, V., 29.8–367

Rainfall acidity
Abrahamsen, G. et al., 29.1–377
Baker, J. et al., 29.1–378
Denison, R. et al., 29.1–381

Stoertz, G. E. et al., 29.1–62

Satellite uses in Earth sciences
United States Congress. Senate. Committee on Commerce, Science, and Transportation, 29.5–6

Satellite uses in forestry

- Waters, M. P., III, 29.6–67

Satellite uses in geology
- Allison, L. J., 29.4–67
- Stoertz, G. E. et al., 29.1–62
- Watson, K. et al., 29.1–63

Satellite uses in hydrology
- Halliday, R. A., 29.8–49
- Paulson, R. W., 29.7–97
- Stoertz, G. E. et al., 29.1–62

Satellite uses in hydrometeorology
- McGinnis, D. F., 29.3–100
- Paulson, R. W., 29.8–52
- Vostryakova, N. V., 29.5–73

Satellite uses in limnology
- Abiodun, A. A. et al., 29.10–518
- Strong, A. E., 29.7–565

Satellite uses in marine meteorology
- Booda, L. L. (ed.), 29.10–49
- Sherman, J. W., III et al., 29.1–60; 29.4–69

Satellite uses in mesometeorology
- Maddox, R. A., 29.2–213

Satellite uses in meteorology
- Barrett, E. C. et al., 29.5–66
- Bunting, J. T. et al., 29.7–85
- De Felice, P., 29.10–50
- Musayelyan, S. A., 29.8–36
- Stewart, K. H., 29.10–64
- Streten, N. A. et al., 29.10–65
- Tänczer, T., 29.11–56
- Villevieille, A., 29.5–72
- World Meteorological Organization, Geneva, 29.3–106

Satellite uses in military meteorology
- Fett, R. W., 29.7–87
- Fujita, T. T., 29.7–34
- Miers, B. T., 29.8–51
- Thomas, J. E., 29.7–101

Satellite uses in oceanography
- Booda, L. L. (ed.), 29.10–49
- Gordon, H. R., 29.9–545
- Sherman, J. W., III et al., 29.1–60; 29.4–69
- Thrane, L., 29.6–85
- Warne, D. K., 29.8–54

Satellite uses in weather analysis
- Dugdale, G. et al., 29.10–93
- Kelly, G. A. M., 29.10–56
- Miller, A. J. et al., 29.7–145
- Ranahan, W. L., 29.10–62

Satellite uses in weather control
- Reynolds, D. W. et al., 29.7–182

Satellite uses in weather forecasting
- Anderson, R. K., 29.11–50
- Druyan, L. M. et al., 29.10–51
- Dugdale, G. et al., 29.10–93
- Fye, F. K. et al., 29.7–88
- Kelly, G. A. M. et al., 29.7–174
- May, J. A., Jr., 29.10–59
- Miller, A. J. et al., 29.7–145
- Ranahan, W. L., 29.10–62
- Sumi, A., 29.9–69
- Tracton, M. S. et al., 29.4–107

Satellite whistler observations
- Ondoh, T., 29.8–431
- Thomson, R. J. et al., 29.2–384; 29.2–385

Satellite X-radiation measurements
- Teuber, D. et al., 29.1–333

Satelliteborne lasers
- Iyer, R. S. et al., 29.1–34
- Smith, W. L. et al., 29.1–35

Satelliteborne microwave radiometers
- Thrane, L., 29.6–85

Satelliteborne ozone sensors
- Lovill, J. E. et al., 29.8–65

Satelliteborne radiometers
- Campbell, S. et al., 29.1–56
- Falbel, G., 29.3–97
- Gille, J. C. et al., 29.3–36
- Houghton, J. T. et al., 29.3–118

Saturn's atmosphere models
- Macy, W., 29.4–537

Saturn's atmospheric temperatures
- Tokunaga, A. et al., 29.4–536

Saturn's rings
- Janssen, M. A. et al., 29.5–474

Saturn's spectrum
- Macy, W., 29.4–537

Scattering by aerosols
- Acquista, C., 29.7–205
- Bednář, J., 29.10–279

CUMULATIVE GEOGRAPHIC INDEX

Vol. 29, Nos. 1–12 (Jan.–Dec. 1978)

(2) PHYSIOGRAPHICAL REGIONS
(213) TROPICAL REGIONS, 29.1–217, 233, 269, 437; 29.3–134, 299; 29.4–93, 228, 229, 380; 29.6–8, 150, 155, 160, 161, 173, 175, 189, 191, 192, 272; 29.8–153, 173, 226; 29.9–118, 129; 29.10–4, 17, 212, 213; 29.11–205, 224, 284, 495; 29.12–137, 146, 323
(215) HEMISPHERES
(215–11) **Eastern Hemisphere**, 29.6–344
(215–13) **Southern Hemisphere**, 29.1–112, 265; 29.3–175, 298, 305; 29.6–120; 29.7–425; 29.8–129, 194, 195; 29.9–18, 105; 29.10–56; 29.11–147; 29.12–115, 411, 515
(215–15) **Western Hemisphere**, 29.4–324
(215–17) **Northern Hemisphere**, 29.1–202, 264, 265; 29.2–474; 29.3–175, 310; 29.4–474, 481; 29.5–424; 29.6–120, 146, 225, 350, 417; 29.7–397, 400; 29.8–150; 29.9–116, 142, 167, 428; 29.11–278, 279, 280, 281, 288, 310; 29.12–255
(23) MOUNTAINS
(234) **Mountains of Europe**
(234.12) Pyrenees, 29.2–512
(234.3) Alps, 29.1–105, 302; 29.2–509; 29.3–391; 29.4–428; 29.7–338; 29.9–45, 386; 29.10–108, 523; 29.12–284, 334, 400, 505
Mt. Blanc, 29.11–569
Mt. Blanc Massif, 29.5–403; 29.12–504
Sonnblick, 29.9–356
Transylvanian, 29.9–299
Prealpine Region, 29.5–404
(234.42) Carpathians, 29.1–408; 29.3–219, 323; 29.9–309, 351
Lotru-Paring, 29.10–296
Paring Massif, 29.9–332
Rila
Maliovitza Valley, 29.7–479
(234.5) Sudeten
Szrenica, 29.6–360
(234.8) Urals, 29.2–475; 29.9–306
(235) **Mountains of Asia**
(235.2) Alays, 29.2–503
Pamirs, 29.2–503
(235.21) Hindu Kush, 29.2–504
Terskey-Ala-Tau, 29.10–343
Tien Shan, 29.2–505; 29.10–266
(235.22) Altays, 29.2–502
Sayan, 29.2–502
(235.24) Himalayas, 29.2–510; 29.12–356
Karakoram, 29.2–511
(235.5) Eastern Ghats, 29.12–379
(237) **Mountains of North America**
(237.1) Alaska Range, 29.2–491
Aleutian Range, 29.2–471
Brooks Range, 29.2–493
Cascades, 29.2–496
Chugach, 29.2–498
Coast Mts., 29.2–499
Kenai, 29.2–500
Kigluaik, 29.2–508
Olympics, 29.2–495
Rockies, 29.2–492, 494; 29.8–326; 29.9–352
San Bernardino, 29.1–109
San Juan, 29.12–97
Sierra Nevada, 29.2–507; 29.5–397; 29.6–341; 29.11–6
St. Elias, 29.2–501
Talkeetna, 29.2–490
Tikchik, 29.2–489
Wrangell, 29.2–497
(237.2) Adirondacks, 29.10–368
Appalachians, 29.3–497; 29.5–291
(238) **Mountains of South America**
(238.1) Andes, 29.2–506
Quelccaya Ice Cap, 29.9–201
Cordillera Blanca, 29.2–513, 514
(26) OCEANS, SEAS, AND INTERCONNECTIONS, 29.1–548; 29.2–17; 29.3–200, 585; 29.4–171; 29.5–77, 170; 29.6–75; 29.7–17, 24, 39, 394, 418; 29.8–308, 310; 29.9–12, 25, 285; 29.10–174, 314; 29.11–268; 29.12–524
(261) **Atlantic Ocean,** 29.1–289, 341, 546, 564; 29.2–352; 29.3–232, 571, 572, 581; 29.4–586; 29.5–10, 540, 551, 557, 568; 29.6–46, 324; 29.7–501, 578; 29.8–572; 29.12–206, 557, 558, 559, 560
(261:213) Tropical Atlantic, 29.1–307, 349, 556;

29.2–35, 51, 191, 296, 297; 29.3–56, 512; 29.4–254, 280, 340, 372, 579; 29.5–52, 53, 54, 56, 62, 151, 288, 298, 300, 314, 341, 561, 567; 29.6–142, 227, 272, 346, 475, 597; 29.7–25, 73, 321, 335, 343, 354; 29.8–238, 246, 533, 536, 557, 574; 29.10–43, 46, 146, 238, 254, 318, 553, 563; 29.11–23, 403, 438; 29.12–51, 584

(261.1) North Atlantic, 29.1–250, 274, 283, 284, 452, 536, 541, 560; 29.2–351, 361, 544, 573; 29.3–87, 221, 564; 29.4–343; 29.5–160, 549, 569; 29.6–237, 463, 551, 570, 587; 29.7–204, 215, 411; 29.8–240, 243, 244, 245, 297, 532, 582; 29.9–294, 558; 29.10–157, 243, 555; 29.11–288, 297, 307, 439, 576, 578, 582; 29.12–202, 304, 430, 525, 532, 536, 544

(261.2) Northeast Atlantic, 29.1–550; 29.3–579; 29.7–399; 29.8–525; 29.10–542; 29.12–545, 547

(261.24) Baltic Sea, 29.2–130, 234; 29.4–600; 29.5–548, 566; 29.6–107; 29.9–321, 565; 29.10–334, 546; 29.11–179, 579, 584; 29.12–40, 507, 589

(261.242) Gulf of Bothnia, 29.6–548; 29.7–570; 29.8–517; 29.9–535, 600

(261.246) Kiel Bight, Southwest Baltic, 29.12–517

(261.247) Oresund, Belts and Sund, 29.12–596

(261.26) North Sea, 29.1–349; 29.2–130; 29.5–577; 29.6–580, 589; 29.7–38; 29.8–18, 563, 29.9–183, 559; 29.10–15, 536, 568, 571, 575; 29.12–40
  Byford, 29.10–331
  Fladenground, 29.12–216
  Josenfjord, 29.10–595

(261.262) German Bight and Frisian Island Waters, 29.5–356

(261.263) Skagerrak
  Oslo Fjord, 29.2–593

(261.267) Strait of Dover, 29.11–48

(261.268) English Channel, 29.5–591; 29.7–596

(261.27) Irish Sea and Coastal Waters of West British Isles, 29.4–360; 29.5–554, 572

(261.28) Bay of Biscay, 29.8–525
  Gironde Estuary, 29.10–597

(261.4) Northwest Atlantic, 29.1–350, 364, 555, 565; 29.3–442, 584; 29.4–118; 29.5–539, 563, 570; 29.6–564; 29.7–69, 584; 29.8–438, 535, 543, 560, 562, 564, 570, 595; 29.9–205, 293, 572, 581; 29.10–226, 255, 529, 548, 586; 29.11–581; 29.12–521, 528

(261.44) Gulf of St. Lawrence
  Magdalen Shallows, 29.10–560

(261.45) Gulf of Maine, 29.8–534; 29.12–577
  Massachusetts Bay, 29.8–570

(261.452) Bay of Fundy, 29.8–590

(261.46) Coastal Waters of East U.S., 29.2–589; 29.8–590; 29.12–537
  Block Island Sound, 29.8–600
  Damariscotta Estuary, 29.2–600
  Delaware Bay, 29.12–518
  Long Island Sound, 29.9–594
  Narragansett Bay, 29.3–599; 29.9–82
  New York Bight, 29.2–86; 29.4–4; 29.10–598; 29.11–423
  York River Estuary, 29.12–600

(261.47) Chesapeake Bay, 29.2–587; 29.8–523; 29.10–114, 534, 599
  Potomac River Estuary, 29.12–598

(261.48) Coastal Waters of Southeast U.S., 29.1–535; 29.6–591; 29.8–25, 575, 576; 29.12–567
  Cape Fear Estuary, 29.7–598
  North Inlet, 29.11–599

(261.5) South Atlantic, 29.1–277, 575; 29.2–194; 29.3–594; 29.5–571; 29.6–367; 29.10–205, 570

(261.6) West and Southwest Atlantic, 29.2–547, 556; 29.5–343, 575; 29.6–564, 581; 29.7–37; 29.8–558; 29.9–5

(261.6–14) Southwest Atlantic, 29.3–588; 29.5–576; 29.8–406; 29.10–529

(261.6–15) West Atlantic, 29.12–540

(261.62) Sargasso Sea, 29.4–341; 29.5–599; 29.6–575; 29.8–552

(261.63) Tongue of the Ocean, Bahama Sea, 29.2–552

(261.638) Florida Strait, 29.1–567; 29.3–591
  Biscayne Bay, 29.2–595

(261.64) Gulf of Mexico, 29.1–568, 570, 572; 29.2–581; 29.3–406, 590; 29.4–114; 29.5–544, 560, 564; 29.7–342; 29.9–189; 29.10–528, 550, 561; 29.12–265, 287
  Corpus Christi Bay, 29.11–600

(261.65) Caribbean Sea, 29.5–544; 29.6–17; 29.12–599
  Cayman Sea, 29.12–287
  Cienfuegos Bay, 29.6–600

(261.67) Coastal Waters of East Brazil, 29.8–567; 29.9–582

(261.7) East and Southeast Atlantic, 29.6–308

(261.7–12) Southeast Atlantic, 29.10–574

(261.74) Coastal Waters of West Africa, 29.2–566, 576; 29.5–552, 562; 29.6–565; 29.7–78; 29.10–558, 559; 29.11–593
(261.76) Gulf of Guinea, 29.2–554; 29.5–558; 29.8–592; 29.10–406; 29.12–57
    Ebrie Lagoon, 29.10–596
(261.78) Coastal Waters of Southwest Africa and West South Africa, 29.1–542; 29.3–577
(262) **Mediterranean Sea**, 29.1–574; 29.3–478; 29.7–582; 29.9–578
(262.1) Western Mediterranean, 29.7–310; 29.10–533, 557
(262.113) Alboran Sea, 29.12–534
(262.116) Ligurian Sea, 29.1–593; 29.7–579
    Gulf of Genoa, 29.3–586
(262.13) Tyrrhenian Sea, 29.8–593; 29.10–552; 29.12–564
(262.16) Coastal Waters of Algeria and North Tunisia
    Strait of Tunis, 29.3–593
(262.2) Eastern Mediterranean, 29.10–532
(262.21) Sicilian Strait, 29.5–556; 29.9–575
(262.3) Adriatic Sea, 29.1–100; 29.3–583; 29.4–598; 29.6–336; 29.11–597
(262.32) Gulf of Venice, 29.12–579
(262.4) Aegean Sea
    Saronicos Bay, 29.7–391
(262.5) Black Sea, 29.11–576
(262.54) Sea of Azov
    Taganrog Bay, 29.8–599
(262.81) Caspian Sea, 29.8–521; 29.9–588; 29.12–583
(262.83) Aral Sea, 29.3–482; 29.8–521; 29.9–596, 597
(265) **Pacific Ocean**, 29.3–569, 575; 29.4–578; 29.5–542; 29.6–333, 559; 29.7–215; 29.8–531
(265:213) Tropical Pacific, 29.2–543, 559; 29.4–234; 29.6–307; 29.7–428; 29.8–568; 29.9–200, 215, 583; 29.10–563; 29.11–284; 29.12–324, 328, 550
(265.1) East and Southeast Pacific, 29.6–308
(265.1–11) East Pacific, 29.1–307; 29.4–340; 29.8–591; 29.12–104, 587
(265.1–12) Southeast Pacific, 29.2–269; 29.11–575; 29.12–557
(265.15) Gulf of Panama, 29.1–436; 29.5–538
(265.16) Coastal Waters of Central America
    Gulf of Chiriqui, 29.1–436
(265.2) North and Northeast Pacific, 29.2–211; 29.7–590; 29.8–573; 29.12–264
(265.2–17) North Pacific, 29.1–279, 545, 573; 29.2–200; 29.3–209; 29.4–234, 304, 584; 29.6–577; 29.7–413, 589; 29.8–75, 298, 526, 527, 569; 29.12–203, 268, 520, 546, 554
(265.2–18) Northeast Pacific, 29.2–97, 98; 29.3–46; 29.4–589; 29.5–530; 29.6–233, 309; 29.7–410, 412, 571; 29.8–522; 29.9–146, 185, 273, 550, 551, 552, 563; 29.12–533, 585
